# PLANK

## Unmatched Performance

- Installs over an existing or new wood joist structure.
- Forms a complete diaphragm over the wood structure - extends your deck lifespan beyond 20 years.
- Supports standard outdoor porcelain tile, stone/concrete pavers, or other surface finishes. Tile is installed with beads of glue - not full adhesion.
- With tile, your deck weighs similar to a standard wood deck, allowing you to utilize existing beams and footings.

**Affordable.** Comparable to the cost of a composite deck. You can use surface options to fit any budget, and the lifespan of a Paverdeck™ adds value to your home.

**Freedom from maintenance.** A maintenance-free steel structure allows for more time on other things.

**Resistant to fire and insects.** A Paverdeck™ plank is not susceptible to fire or rot - it will not allow the fire to burn or weaken the structure.

**Renovation Ready.** Simply remove your existing wood deck boards and replace them with the Paverdeck™ plank structure.

**Rooftop terraces / Balconies.** The Paverdeck™ plank is ideal for rooftop terraces or condominium balconies. The combination of a long lifespan and light weight provides advantages over existing systems.

**Unlimited design options.** Design your space the way you want - A Paverdeck™ plank can be cut and shaped into any design and tile/paver can be installed in any pattern.

**Strong.** With automotive unibody engineering, our patented structure is made from high strength galvanized steel; commercial and residential applications.

Joints can be filled less expensively using Gator TILE SAND, which is a unique mixture of polymer binders and calibrated sand available in a range of colors. Once Gator Tile Sand sets, it becomes very firm and locks between the tile joints while still retaining flexibility and providing a long lasting, durable jointing material.

A Paverdeck™ plank deck can be installed on deck pads or with frost footings.

Porcelain tiles and stone pavers are an excellent outdoor flooring choice with a number of important advantages:

- Available selection at any budget.
- Design flexibility.
- Durability.
- Resistance to liquids.
- Stain-resistance.
